Timber Release Plan

VicForests has prepared a Timber Release Plan as contemplated in Part 5 of the Sustainable Forests (Timber) Act 2004 (Vic) (the **SFT Act**). [Section 37](#) of the **SFT Act** requires VicForests to prepare a plan in respect of an area to which an Allocation Order applies for the purposes of:

- (a) harvesting and selling, or harvesting or selling, timber resources; and
- (b) undertaking associated management activities in relation to those timber resources.

With respect to [Section 43](#) of the **SFT Act**, VicForests is permitted to review and change the Timber Release Plan at any time if the change is not inconsistent with:

- (a) the allocation order to which the plan relates, including any condition, limitation, matter or specification in the order; and
- (b) any relevant Code of Practice relating to timber harvesting.

Specified conditions

VicForests recognises that all planning and operations of VicForests must:

- (a) comply with all relevant laws including, but not limited to:
 - i. the Forests Act 1958 (Vic);
 - ii. the Conservation, Forests and Land Act 1987 (Vic);
 - iii. the Flora and Fauna Guarantee Act 1988 (Vic);
 - iv. the Road Management Act 2004 (Vic); and
 - v. the Traditional Owner Settlement Act 2010 (Vic); and
- (b) comply with all conditions, requirements and limitations in the Allocation Order 2013 as amended.

Approved Changes to Timber Release Plan

The VicForests Board has approved a Change to the Timber Release Plan in accordance with Section 43 of the SFT Act, causing notice in the Government Gazette published on 24 April 2019 (S 154).

The Approved Changes were necessary to:

- Maintain a flexible 2-3 year rolling operation schedule (coupes that have been harvested need to be replaced with new coupes for the future);
- Maintain consistency of the TRP with any changes made by Department of Environment, Land, Water and Planning (DELWP) to the Forest Management Zoning Scheme;
- Modify boundaries and silviculture based on improved planning information gathered on existing approved TRP coupes;
- Removal of coupes which have been successfully regenerated;
- Removal of coupes following stakeholder consultation;
- Incorporation of selected Timber Utilisation Plan coupes into the TRP;
- Facilitate improved access to existing TRP coupes.

Glossary

VicForests Timber Release Plan *Harvesting, Rooding and Associated Activities.*

Coupe – A contiguous area of forest of variable size, shape and orientations from which timber is harvested or a roadline is constructed or improved.

Coupe Address – A unique 12-digit reference number that indicates the location of an individual coupe or roadline.

Driveway / Coupe Driveway - An area between an existing permanent road and the coupe boundary within which a coupe-access road of up to 500m in length may be constructed. The coupe driveway is spatially represented by a separate polygon that is up to 500 metres long and 500m wide and has the same coupe address as the coupe it will access.

Estimated Net - The approximate area expected to be harvested within the coupe boundary. It is the gross coupe area minus any areas likely to be excluded from harvesting due to such factors as Code of Forest Practice exclusions, Forest Management Plan requirements and retained habitat areas.

Forest Stand – Describes the dominant forest type for each particular coupe, (either Mixed Species, or Ash).

Gross Area/ Coupe Boundary - The area within which any individual harvesting or roadline coupe's operations will be conducted. It is represented spatially by the 'proposed coupe boundary' that is mapped within CENGEA Forest Planner and approved for inclusion on a Timber Release Plan.

Road Alignment – A spatially separate 'coupe boundary' polygon with its own coupe address typically more than 500m in length and up to 80m wide that depicts:

- a) An area within which a new road will be constructed with the purpose of accessing a harvesting coupe (Roadline Construction/ RDC). OR
- b) An area of existing road greater than 500 metres in length that requires improvement to a higher standard of classification (Roadline Improvement/ RDI) – e.g. a change of road classification from a 5D class road to a 5C class road.

Road Length – The measured road that links a permanent road (as specified by the Department of Environment, Land, Water and Planning) to a coupe. Coupe-access roads less than 500 metres long are considered to be 'coupe driveways'. A coupe access road longer than 500 metres is considered to be a 'roadline' coupe.

Silviculture System – Describes the method that will be used to regenerate (and hence to harvest) the coupe.

Timber Release Plan / TRP – A Timber Release Plan is a list of areas and corresponding maps, outlining where timber harvesting, regeneration and road works are authorised to be completed by VicForests. Timber Release Plans can fall in the North East, Central, Benalla-Mansfield, Dandenong, Central Gippsland, Tambo and East Gippsland Forest Management Areas (FMA).

TRP Status – An indication of the operational state of a coupe.

- a) Current – Harvesting and/ or road works on the coupe have commenced or have not yet commenced.
- b) Currently regenerating – No further harvesting operations are expected to occur on the coupe. The coupe has transitioned to regeneration works or assessments. Note that there are a number of regenerating coupes that may still appear with a status of "Current"
