

# Forest Operations Coupe Plan

for

Harvest Unit 312-010-0007-A - Messmate Ridge

Marysville

312 - Torbreck River

## Location of coupe centroid

Easting/Northing: (GDA-94)	404533/5845660 Zone 55
VicGrid	2581263/2440672
Latitude/Longitude:	37° 31' 52" S/145° 55' 10" E

This Forest Operations Coupe Plan consists of the following five sections:

- Section 1 - Coupe Description
- Section 2 - Contractor Direction
- Section 3 - Occupational Health and Safety
- Section 4 - Coupe Management Actions
- Section 5 - Harvesting Commencement and Completion Declarations

 Contractor Section - Coupe Description

Descriptive Information		(also see Part 2: Coupe Map - Operation and Context)		
Forest type	Foothill mixed species			
Area of TRP Boundary	50.0			
Area of Harvest Unit (operational area)	23.8			
Regional Forest Agreement	CENTRAL HIGHLANDS			
Forest Management Area	Central			
General aspect	South-westerly			
Elevation	900 meters			
Slope	Minimum 5°; Average 15°; Maximum 15°			
Proportion of the nett coupe area > 20°	0-10 %			
		<b>Horizon A</b>	<b>Horizon B</b>	<b>Horizon C</b>
Soil Erosion Classification		<i>Medium</i>	<i>Medium</i>	<i>Medium</i>
Soil Permeability Classification		<i>High</i>	<i>High</i>	-
Overall Soil Category		<i>Low</i>	<i>Low</i>	-
Rock cover exceeds 30% of nett area	No			

Estimated species and volumes			
Product	Grade	Volume	
Messmate	B	77 m <sup>3</sup>	
Messmate	C	384 m <sup>3</sup>	
Messmate	D	308 m <sup>3</sup>	
Messmate	E	461 m <sup>3</sup>	
Messmate	H	1076 m <sup>3</sup>	
Mountain Grey Gum	B	11 m <sup>3</sup>	
Mountain Grey Gum	C	40 m <sup>3</sup>	

## Estimated species and volumes

<b>Product</b>	<b>Grade</b>	<b>Volume</b>	
Mountain Grey Gum	D	49 m <sup>3</sup>	
Mountain Grey Gum	E	63 m <sup>3</sup>	
Mountain Grey Gum	H	146 m <sup>3</sup>	
Peppermint	E	125 m <sup>3</sup>	
Peppermint	H	125 m <sup>3</sup>

 Contractor Section - Contractor Direction

Personnel	
VF Officer	
Contractor	
Operational Issues	
Silvicultural Intent	Adaptive Silvicultural Systems
Silviculture system(s)	Variable retention 2, Variable retention 1
Recommended harvesting period	Summer of 2020-2021
Description of the coupe boundaries and method used to locate boundary in the field	Northern boundary is LBP Colony buffer & TRP boundary Eastern boundary is slope exclusion, retained area to aid in Visual aesthetics & Smoky Mouse special management area Southern boundary is TRP boundary with Zumba South Western boundary is a dry depression with a 10m filter buffer applied Western boundary is boundary is 40m Rainforest & 20m hydrology buffer  GPS, hipchain & range finder were used to mark the coupe. Harvest boundary is marked in blue flagging tape and will be displayed on the contractors tablet within the harvesting machine.
Operational constraints	None
Social Issues	
Identified social issues	High interest area - Surrounding areas contain Leadbeater's Possum records.
Coupe Access	
Proposed Access	Messmate Ridge Road > Coupe Access Road
Proposed driveway length to construct	175
Proposed in-coupe road length to construct	100
Proposed in-coupe roading requirements	
Proposed number of stream crossings	0
Proposed number of landings	1

**Harvest Unit 312-010-0007-A - Messmate Ridge**  
**FOREST OPERATIONS COUPE PLAN - SECTION 2**  
 Contractor Section - Contractor Direction

Environmental and operational specification Standard		
All operations to be conducted in accordance with the Code of Practice for Timber Production 2014 and VicForests Utilisation Procedures except where additional specifications or variations are specified below. Where there is no comment (ie the column is blank), it should be read 'No variation to the standard procedure'.		
Environmental & Operational Elements		Variations, amendments or additional instructions
Utilisation Procedures Section		
	<b>Planned silvicultural system and requirements</b>	
	Planned silvicultural system and requirements	<p>Post harvesting a Eucalypt Stock Survey (ESS) may be conducted across the site to determine the amount of regeneration from natural seed fall and stump coppice. This will indicate if site preparation is required in any parts of the coupe.</p> <p>If site preparation is required, it is proposed that a regeneration burn is undertaken across the required area of the site to produce a receptive seedbed. Where the regeneration burn is undertaken retained seed and habitat trees will have harvesting debris cleared from around the bole to a distance of 3m. A modified burn strategy will be utilised to avoid excessive scorch on the retained values across the site.</p> <p>This regeneration strategy may be subject to change due to unforeseen factors, such as risk of burning retained coupe values or site conditions being too wet. Alternatively, mechanical disturbance followed by aerial sowing may be used.</p>
	<b>Additional specifications, requirements or instructions</b>	
	Additional specifications, requirements or instructions	
<b>5.</b>	<b>Coupe boundaries</b>	
5.1	Marking a coupe	
5.2	Construction of boundary trails	
5.3	Location of Boundary Trails	
5.4	Converting boundary trail to fire trail	
<b>6.</b>	<b>Excluded areas</b>	

**Harvest Unit 312-010-0007-A - Messmate Ridge**  
**FOREST OPERATIONS COUPE PLAN - SECTION 2**  
 Contractor Section - Contractor Direction

6.1	Activities in excluded areas	
<b>7.</b>	<b>Harvest requirements</b>	
7.1	Retained Trees	Type 1 trees have been identified and will be retained where safe to do so. Each Type 1 will have one (1) recruitment tree retained adjacent in the Variable Two section, preferably Type 2 or Type 3.  In the Variable One section, each Type 1 will have two (2) recruitment tree retained adjacent, preferably Type 2 or Type 3.
7.2	Large Tree Protection	Large tree located adjacent to the Northern boundary has been excluded from the harvest area.  Safety underpins all harvesting operations, if a tree is deemed to be unsafe it may be removed once permission has been granted by the forest officer after inspection.
7.3	Trees to be felled	
7.4	Stump heights	
7.6	Coupe utilisation requirements	
<b>9.</b>	<b>Thinning requirements</b>	
9.2	Trees to be retained	
9.3	Thinning method	
9.4	Damage	
<b>10.</b>	<b>Extraction tracks within coupes</b>	
10.1	Location of Extraction Tracks	
10.2	Blading-off	
10.3	Drainage and rehabilitation	
10.4	Snigging on roads	
10.5	Stream crossings	
<b>12.</b>	<b>Landings</b>	
12.1	Location of landings	Access to the coupe will be via a reinstated 175 metre section of road footprint through the Leadbeater's Possum 'LBP' colony '2019-174' as stated in the MSP 'MSPCT002'. Conditions to be met, required works and actions to be implemented are listed in the twelve points in the MSP mentioned above.

**Harvest Unit 312-010-0007-A - Messmate Ridge**

 Contractor Section - Contractor Direction

12.2	Construction and maintenance of landings	
12.5	Bark disposal	
12.7	Rehabilitation	
<b>13.</b>	<b>Road and construction maintenance</b>	
13.2	Location, design and period of construction	
13.4	Grade	
13.5	Clearing	
13.6	Earthworks	
13.7	Drainage	
13.8	Maintenance	
13.9	Stream and drainage line crossings	
13.11	Closure and rehabilitation of roads	
13.13	Removal and rehabilitation of bridges, crossings and culverts	
<b>14.</b>	<b>Quarries, borrow pits and fill disposal areas</b>	
14.0	Quarries, borrow pits and fill disposal areas	
<b>15.</b>	<b>Preparation, measurement, grading and extraction of logs</b>	
15.2	Log preparation	
<b>21.</b>	<b>Carting logs</b>	
21.1	Carting logs - general obligations of the driver	
<b>23.</b>	<b>Weather restrictions</b>	
23.0	Weather restrictions	
<b>26.</b>	<b>Sorting and using fuel and servicing machinery</b>	

**Harvest Unit 312-010-0007-A - Messmate Ridge**  
**FOREST OPERATIONS COUPE PLAN - SECTION 2**  
Contractor Section - Contractor Direction

26.1	Fuel location	
26.2	Fuel precautions	
<b>27.</b>	<b>Camp sites, waste disposal and forest hygiene</b>	
27.1	Camp sites	
27.3	Water points	
27.4	Forests hygiene (weeds, pests and disease)	
27.5	Field Washdown/Cleaning Procedure for Machinery	
<b>All other action will be conducted as per the Utilisation Procedures, unless outlined in the Coupe Diary by a VicForests Officer.</b>		

Habitat Retention Plan

**Harvest Unit 312-010-0007-A - Messmate Ridge**  
**FOREST OPERATIONS COUPE PLAN - SECTION 2**  
 Contractor Section - Contractor Direction

<b>Habitat Description and Marking</b>	<p>Silvicultural Intent:          Adapting to pre-harvest survey information, plot data and other values, the coupe will be harvested under the silviculture systems Variable Retention 1 (VR1) &amp; Variable Retention 2 (VR2). Harvest contractors will be briefed on identification of HBTs and HCVs, as well as the retention strategy objective for this coupe.</p> <p>Variable Retention One (7.6ha)          Seed trees will be retained at a minimum density of 9 trees per ha (33m spacings). Type 1 trees have been identified and will be retained where safe to do so. Each Type 1 will have two (2) recruitment trees retained adjacent, preferably Type 2 or Type 3. Suppressed regrowth and younger trees that are unmerchantable due to size will also be left where possible for recruitment. Islands will be retained throughout the coupe, the locations of these islands will be chosen by the contractor relative to the habitat components featured throughout the harvest areas, surrounding forest and pre harvest survey species observations.</p> <p>Variable Retention Two (16.17ha)          Seed trees will be retained at a minimum density of 9 trees per ha (33m spacings). Type 1 trees have been identified and will be retained where safe to do so. Each Type 1 will have one (1) recruitment tree retained adjacent, preferably Type 2 or Type 3. Suppressed regrowth and younger trees that are unmerchantable due to size will also be left where possible for recruitment. Islands will be retained throughout the coupe, the locations of these islands will be chosen by the contractor relative to the habitat components featured throughout the harvest areas, surrounding forest and pre harvest survey species observations.</p>

Issues identified						
1. Situation	Value	Identified by spatial overlay as	Identified during manual check as	Value Description	How the value will be managed	Management Action Taken or Prescription Applied
VF Reserve within 500m	LBPAG - LBP Known Colony Protection Reserve	76.61	76.61	VicForests Reserves VFSMP64 (LBP Colony Protection Reserve) located within 500m of coupe boundary.	No action required	
VF SMA in coupe	FAUNA_SMOKY_SMA	11.56	11.56	Special Management Area VFSMP275 (Smoky Mouse SMA) located within coupe boundary.	Harvesting, roading and regeneration activities to be in accordance with VFSMP275.	Smoky Mouse SMA has been excluded from the harvest area.
VF SMA within 500m	FAUNA_SMOKY_SMA	44.22	44.22	Special Management Area VFSMP275 (Smoky Mouse SMA) located within 500m of the coupe boundary.	No action required	
Walking track in coupe	Walking track	Not Present	Not Present	No action required		
Walking track within 500m of coupe	Walking track	Not Present	Not Present	No action required		
2. Stand	Value	Identified by spatial overlay as	Identified during manual check as	Value Description	How the value will be managed	Management Action Taken or Prescription Applied
Allocation Order Stratum	Ash	6.47	6.47	Coupe overlay indicates 6.47ha of Ash Species within the gross coupe boundary.	Harvest in accordance with the Allocation Order to VicForests and Code of Practice for Timber Production.	Harvest in accordance with the Allocation Order to VicForests and Code of Practice for Timber Production.
Allocation Order Stratum	Mixed Species	43.55	43.55	Coupe overlay indicates 43.55ha of Mixed Species within the gross coupe boundary.	Harvest in accordance with the Allocation Order to VicForests and Code of Practice for Timber Production.	Harvest in accordance with the Allocation Order to VicForests and Code of Practice for Timber Production.
3. Soil and Water	Value	Identified by spatial overlay as	Identified during manual check as	Value Description	How the value will be managed	Management Action Taken or Prescription Applied
Designated Water Catchment within coupe	UPPER GOULBURN	50.02	50.02	Coupe is located within Upper Goulburn water supply catchment.	Upper Gou burn catchment restrictions: No harvesting slopes >30 degrees. Apply minimum buffer widths of 20m and filter widths of 10m. No seasonal closure restriction to harvesting and associated activities.	Areas > 30 degrees have been excluded from the harvest area. 10m filter has been placed on dry depression on South Western boundary.
Designated Water Supply Catchment within 500m	UPPER GOULBURN	257.01	257.01	Coupe is located within Upper Goulburn water supply catchment.	No action required

Issues identified						
3. Soil and Water	Value	Identified by spatial overlay as	Identified during manual check as	Value Description	How the value will be managed	Management Action Taken or Prescription Applied
Other water issues	[n/a]	[n/a]				
Slope Class within coupe	0-20 Degrees	21.66	21.66	Gross coupe area contains area of slope between 0-20 degrees.	Harvest in accordance with the Code of Practice for Timber Production, Management Procedures and Utilisation Procedures.	Harvest in accordance with the Code of Practice for Timber Production, Management Procedures and Utilisation Procedures.
Slope Class within coupe	20-25 Degrees	12.70	12.70	Gross coupe area contains area of slope between 20-25 degrees.	Harvest in accordance with the Code of Practice for Timber Production, Management Procedures and Utilisation Procedures.	Harvest in accordance with the Code of Practice for Timber Production, Management Procedures and Utilisation Procedures.
Slope Class within coupe	25-30	9.15	9.15	Gross coupe area contains area of slope between 25-30 degrees.	Harvest in accordance with the Code of Practice for Timber Production, Management Procedures and Utilisation Procedures.	Harvest in accordance with the Code of Practice for Timber Production, Management Procedures and Utilisation Procedures.
Slope Class within coupe	30+	6.50	6.50	Gross coupe area contains area of slope >30 degree slope.	Upper Gou burn catchment restrictions: No harvesting slopes >30 degrees.	Areas > 30 degrees have been excluded from the harvest area.
Water quality risk within coupe	Low or Moderate Water Quality Risk	[n/a]	Present	Soil Assessments have determined the overall Water Quality Risk (Soil Erosion category) to be Low or Moderate within this coupe.	Harvest in accordance with the Code of Practice for Timber Production, Management Procedures and Utilisation Procedures.	Harvest in accordance with the Code of Practice for Timber Production, Management Procedures and Utilisation Procedures.
4. Biodiversity	Value	Identified by spatial overlay as	Identified during manual check as	Value Description	How the value will be managed	Management Action Taken or Prescription Applied
Barred Galaxias streams in coupe or within 500m	Barred Galaxias catchment in coupe or within 500m	Not Present	Not Present	No action required		
Greater Glider Habitat Within 100m (Modelled Class1)	Modelled Greater Glider Habitat within 100m	Present	Present	Coupe overlay has identified Modelled Greater Glider High Quality Habitat within the coupe boundary.	Apply VicForests Greater Glider Conservation Strategy prescriptions. Consideration should be given to the protection of live, large, hollow-bearing trees through all forest management activities including regeneration burning.	40% of the TRP's basal area will be retained. This is achieved through exclusion, aggregated and dispersed retention techniques such as widened boundaries, retention islands and retained trees (habitat, recruitment and seed trees) within the coupe.

Threatened EVC in coupe	* None found *	0.00	0.00	No action required		
Threatened EVC within 500m	Cool Temperate Rainforest	0.89	0.89	Rainforest EVC was identified during the overlay process, located within 500 metres of the southern coupe boundary. Presence will not impact on gross coupe area.	If Rainforest is identified in the field, buffer in accordance with the VicForests Rainforest Identification Instruction.	There is the potential that Cool Temperate Rainforest and Mixed Forest are present within the coupe area, assumed along the major gully system / northern boundary of the coupe. Rainforest stands appear to be aggregated with Mountain Ash intermittently dispersed throughout, potentially creating areas of Mixed Forest. A precautionary 40m buffer has been applied to areas showing the potential sizing and density requirements of rainforest.

4. Biodiversity	Value	Identified by spatial overlay as	Identified during manual check as	Value Description	How the value will be managed	Management Action Taken or Prescription Applied
Threatened fauna site in coupe	Tyto tenebricosa: Sooty Owl	Present	Present	Coupe overlay process has detected Sooty Owl species observations in Victorian Biodiversity Atlas (VBA) records within the gross coupe boundary.	Individual records of this species do not require any management actions within the area covered by the Central Highlands Forest Management Plan. Apply VicForests HCV management system. Foresters to be vigilant for potential roosting or nesting sites. If identified operations must cease immediately within a 300m radius of the identified site and the Manager Forest Policy and Compliance notified. Where identified, harvesting must not commence or re-commence within the vicinity until advice has been provided by either Manager Biodiversity Conservation and Research or Manager Forest Policy and Compliance.	Apply VicForests HCV management system.
Threatened fauna site in coupe	Petauroides volans: Greater Glider	Present	Present	Coupe overlay process has detected Greater Glider species observations in Victorian Biodiversity Atlas (VBA) records within the gross coupe boundary.	Apply VicForests Greater Glider Conservation Strategy prescriptions. Retain at least 40% of the basal area of eucalypts across TRP coupe prioritising the protection of live, large, hollow-bearing trees through all forest management activities including regeneration burning.	40% of the TRP's basal area will be retained. This is achieved through exclusion, aggregated and dispersed retention techniques such as widened boundaries, retention islands and retained trees (habitat, recruitment and seed trees) within the coupe.
Threatened fauna site in coupe	Petaurus australis: Yellow-bellied Glider	Present	Present	Coupe overlay process has detected Yellow-bellied Glider species observations in Victorian Biodiversity Atlas (VBA) records within the gross coupe boundary.	Retain at least 40% of the basal area of eucalypts across TRP coupe prioritising the protection of live, large, hollow-bearing trees through all forest management activities including regeneration burning.	40% of the TRP's basal area will be retained. This is achieved through exclusion, aggregated and dispersed retention techniques such as widened boundaries, retention islands and retained trees (habitat, recruitment and seed trees) within the coupe.

Threatened fauna site within 500m of coupe	Petauroides volans: Greater Glider	Present	Present	Coupe overlay process has detected Greater Glider species observations in Victorian Biodiversity Atlas (VBA) records within 500m of the coupe boundary.	Apply VicForests HCV management system. Prioritise the largest, live, hollow-bearing trees for habitat retention.	40% of the TRP's basal area will be retained. This is achieved through exclusion, aggregated and dispersed retention techniques such as widened boundaries, retention islands and retained trees (habitat, recruitment and seed trees) within the coupe.
Threatened fauna site within 500m of coupe	Petaurus australis: Yellow-bellied Glider	Present	Present	Coupe overlay process has detected Yellow-bellied Glider species observations in Victorian Biodiversity Atlas (VBA) records within 500m of the coupe boundary.	Apply VicForests HCV management system. Prioritise the largest, live, hollow-bearing trees for habitat retention.	40% of the TRP's basal area will be retained. This is achieved through exclusion, aggregated and dispersed retention techniques such as widened boundaries, retention islands and retained trees (habitat, recruitment and seed trees) within the coupe.
Threatened fauna site within 500m of coupe	Gymnobelideus leadbeateri: Leadbeater's Possum Colony	Present	Present	Coupe overlay process has detected Leadbeater's Possum species observations in Victorian Biodiversity Atlas (VBA) records within 500m of the coupe boundary.	LBP Colonies have been protected by a 200m buffer in VicForests Reserve VFSMP64. Reserve boundary to be confirmed and marked in the field using a GPS, compass, hip chain and/or range finder. Boundary to be signed off by Senior Forester prior to harvesting commencement. No harvesting or associated activities will occur within the VF Reserve.	LBP Colony VFSMP64 has been excluded from the harvest area. Boundary has been signed off by Senior Forester.
Threatened fauna site within 500m of coupe	Burrmys parvus: Mountain Pygmy Possum	Present	Present	No action required. Data error, Mountain Pygmy-possum not observed.	No action required

**Contractor Section - Harvesting Commencement & Completion Declarations**

Harvesting commencement declaration	Contractor/HTL Initial	VicForests Initial
▪ I have received a copy of the Forest Coupe Plan and a copy of the Utilisation Procedures.		
▪ I have discussed this Forest Coupe Plan with an Officer of VicForests and understand it.		
▪ I will ensure that this operation is conducted in accordance with the Forest Coupe Plan, the Utilisation Procedures and the Occupational Health and Safety Act.		
▪ I will ensure that all operators working on this coupe are aware of their responsibilities under this Forest Coupe Plan.		
▪ I will ensure that all operators hold a current FOLS with all appropriate endorsements prior to them commencing work on the coupe.		
▪ An identification of hazards associated with this coupe was conducted in accordance with the Industry Standard: Safety in Forestry Operations (Harvesting and Haulage) 2007 and the Occupational Health and Safety Act 2004.		
▪ The Contractor/HTL acknowledges that it is their responsibility to identify the appropriate controls for all identified hazards. VicForests acknowledges that the Contractor/HTL has a hazard control plan that identifies all addresses all identified hazards.		
▪ Landing(s) location has been agreed to by VicForests and the Contractor/HTL		
▪ Location/selection of retained trees has been agreed to by VicForests and the Contractor/HTL		
▪ I have been briefed on the identification and habitat retention strategies put in place to manage Biodiversity Values identified in this coupe as outlined in the HCV summary and retention plan
