

Forest Operations Coupe Plan

for

Harvest Unit 347-513-0003-A - Boys Camp

Powelltown

347 - Little Yarra

Location of coupe centroid

Easting/Northing: (GDA-94)	391421/5807653 Zone 55
VicGrid	2567346/2402945
Latitude/Longitude:	37° 52' 20" S/145° 45' 56" E

This Forest Operations Coupe Plan consists of the following five sections:

- Section 1 - Coupe Description
- Section 2 - Contractor Direction
- Section 3 - Occupational Health and Safety
- Section 4 - Coupe Management Actions
- Section 5 - Harvesting Commencement and Completion Declarations

FOREST OPERATIONS COUPE PLAN - SECTION 1
 Contractor Section - Coupe Description

Descriptive Information		(also see Part 2: Coupe Map - Operation and Context)		
Forest type	Foothill mixed species			
Area of TRP Boundary	32.0			
Area of Harvest Unit (operational area)	18.5			
Regional Forest Agreement	CENTRAL HIGHLANDS			
Forest Management Area	Dandenong			
General aspect	Northerly			
Elevation	380 meters			
Slope	Minimum 0°; Average 15°; Maximum 30°			
Proportion of the nett coupe area > 20°	11-40 %			
		Horizon A	Horizon B	Horizon C
Soil Erosion Classification		<i>Medium</i>	<i>Medium</i>	<i>Medium</i>
Soil Permeability Classification		<i>High</i>	<i>High</i>	-
Overall Soil Category		<i>Low</i>	<i>Low</i>	-
Rock cover exceeds 30% of nett area	No			

Estimated species and volumes			
Product	Grade	Volume	
Messmate	B	143 m ³	
Messmate	C	502 m ³	
Messmate	D	143 m ³	
Messmate	E	359 m ³	
Messmate	H	2331 m ³	
Mountain Ash	B	11 m ³	
Mountain Ash	C	40 m ³	

Estimated species and volumes

Product	Grade	Volume
Mountain Ash	D	11 m ³
Mountain Ash	E	9 m ³
Mountain Ash	H	212 m ³
Silvertop	B	108 m ³
Silvertop	C	377 m ³
Silvertop	D	108 m ³
Silvertop	E	269 m ³
Silvertop	H	1749 m ³

FOREST OPERATIONS COUPE PLAN - SECTION 2
 Contractor Section - Contractor Direction

Personnel	
VF Officer	
Contractor	
Operational Issues	
Silvicultural Intent	Adaptive Silvicultural Systems
Silviculture system(s)	Seed Tree (includes retained overwood), Variable retention 1
Recommended harvesting period	Summer of 2020-2021
Description of the coupe boundaries and method used to locate boundary in the field	Western Boundary- marked to a stream buffer with additional exclusion for increased waterway protection, habitat and visual buffer. Southern Boundary- marked to the TRP boundary and 50m Tree Geebung buffer. Northern Boundary- aligns to a visual buffer and a 60m buffer from the edge of the mown grass/backyard/campfire area of the DELWP owned property. This was measured with the use of hipchain/stringline and marked in pink tape at the location agreed by DELWP during site visit on the 16/11/2020. Eastern Boundary- marked to a stream buffer with additional exclusion for increased waterway protection, habitat and visual buffer.
Operational constraints	GPS, Compass, clinometer, hip chain, and range finder used to mark harvest unit.
Social Issues	
Identified social issues	Coupe located with in 100m of Private properties.
Coupe Access	
Proposed Access	Access to coupe will be through above coupe to the South (Ambi Turner).
Proposed driveway length to construct	0
Proposed in-coupe road length to construct	300
Proposed in-coupe roading requirements	
Proposed number of stream crossings	0
Proposed number of landings	1

Harvest Unit 347-513-0003-A - Boys Camp
FOREST OPERATIONS COUPE PLAN - SECTION 2
 Contractor Section - Contractor Direction

Environmental and operational specification Standard		
All operations to be conducted in accordance with the Code of Practice for Timber Production 2014 and VicForests Utilisation Procedures except where additional specifications or variations are specified below. Where there is no comment (ie the column is blank), it should be read ' <i>No variation to the standard procedure</i> '.		
Environmental & Operational Elements		Variations, amendments or additional instructions
Utilisation Procedures Section		
Planned silvicultural system and requirements		
	Planned silvicultural system and requirements	Additional hollow bearing trees > 150cm DBH that contain 1 or more additional hollows of at least 15cm to be retained within 75m of boundary where practicable and safe to do so. Seed tree and habitat trees selected by the contractor (and therefore not marked in the field or designated on the coupe map). As delineated on Operations map - Retain 4 additional trees for each HBT type 1 identified in a Clear-fell/Seed Tree system, and 4-5 trees per Ha at 40m spacings. As delineated on Operations map - Retain 2 additional trees for each HBT type 1 identified in a Variable retention 1 system.
Additional specifications, requirements or instructions		
	Additional specifications, requirements or instructions	
5.	Coupe boundaries	
5.1	Marking a coupe	Coupe boundary marked in Pink tape, filter marked in Orange tape, roadline marked in red tape, Treegeebung buffer marked in Blue tape.
5.2	Construction of boundary trails	Boundary trail to be constructed ahead of harvesting.
5.3	Location of Boundary Trails	Mineral earth fire trail to be constructed at completion of harvested section.
5.4	Converting boundary trail to fire trail	Mineral earth fire trail to be constructed at completion of harvested section.
6.	Excluded areas	
6.1	Activities in excluded areas	

Harvest Unit 347-513-0003-A - Boys Camp
FOREST OPERATIONS COUPE PLAN - SECTION 2
 Contractor Section - Contractor Direction

7.	Harvest requirements	
7.1	Retained Trees	No tree, stag or spar to remain within 1 tree length of boundary or road. No living trees >250cm dbh to be fallen or pushed.
7.2	Large Tree Protection	
7.3	Trees to be felled	
7.4	Stump heights	
7.6	Coupe utilisation requirements	
9.	Thinning requirements	
9.2	Trees to be retained	
9.3	Thinning method	
9.4	Damage	
10.	Extraction tracks within coupes	
10.1	Location of Extraction Tracks	Snig track to be ripped 30m from landing at coupe completion. Topsoil to be respread before ripping.
10.2	Blading-off	
10.3	Drainage and rehabilitation	
10.4	Snigging on roads	
10.5	Stream crossings	
12.	Landings	
12.1	Location of landings	Snig track to be ripped 30m from landing at coupe completion. Topsoil to be respread before ripping.
12.2	Construction and maintenance of landings	
12.5	Bark disposal	
12.7	Rehabilitation	
13.	Road and construction maintenance	

Harvest Unit 347-513-0003-A - Boys Camp
FOREST OPERATIONS COUPE PLAN - SECTION 2
 Contractor Section - Contractor Direction

13.2	Location, design and period of construction	
13.4	Grade	
13.5	Clearing	
13.6	Earthworks	
13.7	Drainage	
13.8	Maintenance	
13.9	Stream and drainage line crossings	
13.11	Closure and rehabilitation of roads	
13.13	Removal and rehabilitation of bridges, crossings and culverts	
14.	Quarries, borrow pits and fill disposal areas	
14.0	Quarries, borrow pits and fill disposal areas	
15.	Preparation, measurement, grading and extraction of logs	
15.2	Log preparation	
21.	Carting logs	
21.1	Carting logs - general obligations of the driver	
23.	Weather restrictions	
23.0	Weather restrictions	
26.	Sorting and using fuel and servicing machinery	
26.1	Fuel location	
26.2	Fuel precautions	
27.	Camp sites, waste disposal and forest hygiene	
27.1	Camp sites	

Harvest Unit 347-513-0003-A - Boys Camp
FOREST OPERATIONS COUPE PLAN - SECTION 2
 Contractor Section - Contractor Direction

27.3	Water points	
27.4	Forests hygiene (weeds, pests and disease)	
27.5	Field Washdown/Cleaning Procedure for Machinery	

All other action will be conducted as per the Utilisation Procedures, unless outlined in the Coupe Diary by a VicForests Officer.

Habitat Retention Plan

Habitat Description and Marking	<p>Forest Stands: The TRP area of the coupe is 32.0 ha and consists of four EVC classes: EVC - 29 Damp Forest, EVC - 45 Shrubby Foothill Forest, EVC - 18 Riparian Forest and EVC - 30 Wet Forest and predominately consists of uneven aged mixed species eucalypt forest, which originated from 1939 bushfires and earlier regeneration events which mainly consists of silvertop ash (<i>Eucalyptus Sieberi</i>, Messmate Stringybark <i>E.obliqua</i>, Mountain Ash <i>E.regnans</i> and a smaller proportion of narrow leaved peppermint <i>E radiata</i>.</p> <p>HCV: A patch of HBT 1's identified in the South Western corner of the coupe. Greater Gliders have been detected in the northern section of the TRP. Coupe within Firemanagement Zone 2: Fuel Hazard rating must be equal to or less than high within 12 months of harvesting. The coupe is in the scenic viewshed of Powelltown township and Yarra- Junction - noojee road. Tree Geebung have been identified within gross coupe area. Coupe is within 500m of private properties and 1500m from Powelltown township which Vicforests has undertaken a range of consultation and engagement activities to provide local residents and stakeholders the opportunity to express their views and concerns. Private property (DELWP lease) is within the TRP but not in the harvest unit. An historic site (Blakes mill) is within 500m of coupe boundary. Tramline and walking Tracks are within northern section of TRP. The coupe is within Yarra River catchment which provides water for agriculture, horticulture and the Melbourne domestic water supply network via sugarloaf reservoir. The coupe is within Fire management Zone 2: Bushfire moderation. To maintain fuel management risks the overall fuel hazard rating for the coupe must be less than or equal to high within 12 months of harvesting.</p> <p>Description of harvest area: Adaptive seed tree retention (Ad.STR) with patch retention of habitat trees will be applied to the 1939 regeneration dominated stand in the central section of the coupe. Variable retention 1 (VR1)</p>
--	--

will be applied to the South western section.
 The VR1 area includes the majority of the HBT 1's identified. Existing HBT 2's and 3's will be retained within the harvest unit.

Western Boundary- marked to a stream buffer with additional exclusion for increased waterway protection, habitat and visual buffer.
 Southern Boundary- marked to the TRP boundary and 50m Tree Geebung buffer.
 Northern Boundary- aligns to a visual buffer and a 60m buffer from the edge of the mown grass/backyard/campfire area of the DELWP owned property. This was measured with the use of hipchain/stringline and marked in pink tape at the location agreed by DELWP during site visit on the 16/11/2020.
 Eastern Boundary- marked to a stream buffer with additional exclusion for increased waterway protection, habitat and visual buffer.
 GPS, Compass, clinometer, hip chain, and range finder used to mark harvest unit.
 Habitat patches have been identified in five locations within the harvest unit.

Seed trees to be selected by contractor in mixed species section of coupe.
 All retained Habitat trees, Seed trees and recruitment trees to be cleared around at a 3m width.
 Prioritise the largest, live, hollow bearing trees for Habitat retention.

Habitat trees will be retained...	Scenario
. Outside the harvesting tapes, but within the 'gross coupe boundary'	Yes
. As individual trees along the edge, outside the harvested area	No
. As individual trees, scattered throughout the coupes	Yes
. In patch(es)/clump(s) within the harvested area	Yes
. To serve as seed trees also	Yes
. Other requirements	No

Other requirements

** See variation page for marking procedure.*

Harvest Unit 347-513-0003-A - Boys Camp
FOREST OPERATIONS COUPE PLAN - SECTION 3
 Contractor Section - Coupe Occupational Health and Safety

Hazard Type	Comments on the identified hazard where the hazard exceeds that normally expected	Hazard adequately addressed within Contractor's Safety Management System?
Was a field-based hazard assessment done?	Yes / No	
Arial Hazard		
Stags	[None]	
Other aerial hazards	[None]	
Percentage of tress containing a high proportion of dead limbs (i.e. mature-age, psyllid, drought or fire affected)	5 % if > 50% handfall not allowed as main harvest method.	
Percentage of the trees having mature interlocked crowns	5 % if > 50% handfall not allowed as main harvest method.	
Ground Hazard		
Slope	[None]	
Rock	1 large rock in the North West section of the coupe	
Rock Faces	[None]	
Morganers	[None]	
Other Ground Hazards	[None]	
Have any mineshafts been located? If yes, GPS location and include coupe map.	[None]	
Access Roads/Landings		
Grade	[None]	
Width	[None]	
Traffic & Falling Ops	[None]	
Access	[None]	

Harvest Unit 347-513-0003-A - Boys Camp
FOREST OPERATIONS COUPE PLAN - SECTION 3
 Contractor Section - Coupe Occupational Health and Safety

Are there hazardous trees adjacent trees to the roads that should be removed?	[None]	
Fire	[None]	
Hand Falling	[None]	
Other	[None]	
Is there any power lines/cables in or around coupe?	[None]	
Are there neighbours that will need to be notified of operations?	[None]	
Safety Comments		

Additional hazards identified				
<i>Describe hazard</i>	<i>Action Required</i>	<i>Responsible person</i>	<i>Date Required</i>	<i>Complete Y/N</i>

End of Forest Operations Coupe Plan Section 3

Harvest Unit 347-513-0003-A - Boys Camp
FOREST OPERATIONS COUPE PLAN - SECTION 4
Forester Section - Coupe Management Actions

Issues identified						
1. Situation	Value	Identified by spatial overlay as	Identified during manual check as	Value Description	How the value will be managed	Management Action Taken or Prescription Applied
Apiary zone within 1600m	* None found *	Not Present	Not Present	No action required		
Apiary zone within coupe	* None found *	Not Present	Not Present	No action required		
Bicentennial Trail in coupe	Bicentennial Trail in coupe	0.00	0.00	No action required		
Bicentennial Trail within 500m of coupe	Bicentennial Trail with 500m	Not Present	Not Present	No action required		
Fire Fuel Management Zone in coupe	0 - Non FPA Land	0.01	0.01	Coupe has an area of 0.01ha located within Non FPA land.	Mapping error. This area is not within planned harvest unit. No further action.	
Fire Fuel Management Zone in coupe	2 - Bushfire Moderation Zone	32.03	32.03	Coupe within Fire Management Zone 2: Bushfire Moderation. For seedtree or clearfell operations, a rolling 5-year average(calculations commencing 1 July 2012) of a maximum of 1% of the GMZ/SMZ area of each management unit is permitted each year. The overall fuel hazard rating for the clearfell or seedtree harvested coupe must be less than or equal to high within 12 months of harvesting.	Fire Management Zone analysis undertaken 08/11/2020 demonstrates compliance. The overall fuel hazard rating for the clearfell or seedtree harvested coupe must be less than or equal to high within 12 months of harvesting.	The fuel hazard rating of the harvest unit will be reduced to high within 12 months after harvesting.
Forest Management Zone within 200m	CFP : Code of Forest Practice	Present	Present	Modelled Code of Practice for Timber Production exclusion areas adjacent to coupe boundary.	Protection requirements will be determined during field marking of the coupe in accordance with the VicForests Operating Procedures and Code of Practice for Timber Production.	Harvest unit has been marked with pink tape with the use of GPS, Compass, clinometer, hip chain and Range finder. Areas >30 degree slope have been marked out of the harvest unit. Permanent and temporary streams have been buffered out of the Harvest unit.
Forest Management Zone within 200m	GMZ : General Management Zone	Present	Present	General Management Zone adjacent to coupe boundary.	No further action required.	
Forest Management Zone within 200m	OPL : Other Public Land	Present	Present	Other public land within 500m of coupe boundary corresponds to Little Yarra river frontage.	Other public land is not within or adjacent to coupe boundary and will not be affected by harvesting.	Harvest unit has been marked outside the landscape SMZ in pink tape with the use of GPS, Compass, clinometer, hip chain and Rangefinder. A 60m buffer from the mown grass/backyard/campfire area of the DELWP owned property was agreed to by DELWP. This 60m buffer was measured with the use of a hip chain/stringline (location agreed to by VicForests & DELWP).

Harvest Unit 347-513-0003-A - Boys Camp
FOREST OPERATIONS COUPE PLAN - SECTION 4
Forester Section - Coupe Management Actions

Issues identified						
1. Situation	Value	Identified by spatial overlay as	Identified during manual check as	Value Description	How the value will be managed	Management Action Taken or Prescription Applied
Forest Management Zone within 200m	SMZ : Special Management Zone	Present	Present	Special Management Zone (SMZ) 347/10 (describe values) located adjacent to coupe boundary.	SMZ boundary to be confirmed in the field. SMZ area of coupe is not within planned harvest unit and will not be affected by harvesting.	Harvest unit has been marked out side the landscape SMZ in pink tape with the use of GPS, Compass, clinometer, hipchain and Range finder. A 60m buffer from the mown grass/backyard/campfire area of the DELWP owned property was agreed to by DELWP. This 60m buffer was measured with the use of a hip chain/stringline (location agreed to by VicForests & DELWP).
Forest Management Zone within 200m	SPZ : Special Protection Zone	Present	Present	Special Protection Zone (SPZ) 347/04 located within 200 meters of coupe boundary. The SPZ values are Linear Reserve, Recreation Sites (Reid's Tramline Loop and Log and Bogie Display - Powelltown), Cool Temperate Rainforest, landscape view from Little Yarra Road), LBP Colony.	SPZ is not within or adjacent to coupe boundary and will not be affected by harvesting. No further action.	
Forest Management Zone within 500m	CFP : Code of Forest Practice	Present	Present	Modelled Code of Practice for Timber Production exclusion areas adjacent to coupe boundary.	Protection requirements will be determined during field marking of the coupe in accordance with the VicForests Operating Procedures and Code of Practice for Timber Production.	Harvest unit has been marked with pink tape with the use of GPS, Compass, clinometer, hip chain and Range finder. Areas >30 degree slope have been marked out of the harvest unit. Permanent and temporary streams have been buffered out of the Harvest unit.
Forest Management Zone within 500m	GMZ : General Management Zone	Present	Present	General Management Zone (GMZ) within 500m of coupe boundary.	No further action required.	
Forest Management Zone within 500m	OPL : Other Public Land	Present	Present	Other public land within 500m of coupe boundary corresponds to Little Yarra river frontage.	Other public land is not within or adjacent to coupe boundary and will not be affected by harvesting. no further action	
Forest Management Zone within 500m	SMZ : Special Management Zone	Present	Present	Special Management Zone (SMZ) 347/10 (describe values) located adjacent to coupe boundary.	SMZ boundary to be confirmed in the field. SMZ area of coupe is not within planned harvest unit and will not be affected by harvesting.	Harvest unit has been marked out side the landscape SMZ in pink tape with the use of GPS, Compass, clinometer, hip chain and Range finder. A 60m buffer from the mown grass/backyard/campfire area of the DELWP owned property was agreed to by DELWP. This 60m buffer was measured with the use of a hip chain/stringline (location agreed to by VicForests & DELWP).

Forester Section - Coupe Management Actions

Issues identified						
1. Situation	Value	Identified by spatial overlay as	Identified during manual check as	Value Description	How the value will be managed	Management Action Taken or Prescription Applied
Forest Management Zone within 500m	SPZ : Special Protection Zone	Present	Present	Special Protection Zone (SPZ) 347/04 (management type eg. Apiary) located within 500m of coupe boundary.	SPZ is not within or adjacent to coupe boundary and will not be affected by harvesting. No further action.	
Forest Management Zone within coupe	CFP : Code of Forest Practice	3.53	3.53	The proposed gross coupe area contains 2 permanent streams and associated drainage lines, and has an 1ha area of >30 degree slope.	Protection requirements will be determined during field marking of the coupe in accordance with the VicForests Operating Procedures and Code of Practice for Timber Production.	Harvest unit has been marked with pink tape with the use of GPS, Compass, clinometer, hipchain and Range finder. Areas >30 degree slope have been marked out of the harvest unit. Permanent and temporary streams have been buffered out of the Harvest unit.
Forest Management Zone within coupe	GMZ : General Management Zone	25.62	25.62	General Management Zone within gross coupe boundary.	Operations will be in accordance with the Code of Practice for Timber Production.	Harvest unit boundary has been marked with pink tape and is no more than 20m outside the TRP into the coupe Ambi Turner.
Forest Management Zone within coupe	OPL : Other Public Land	0.00	0.01	Coupe has an area of 0.01ha located within Non FPA land.	Mapping error. This area is not within planned harvest unit. No further action.	
Forest Management Zone within coupe	SMZ : Special Management Zone	2.78	2.78	Special Management Zone (SMZ) 347/10 located within gross coupe boundary. The SMZ value is Landscape (Powelltown - Noojee road). The requirements of this plan will affect 2.78ha of the gross coupe area.	SMZ boundary to be confirmed in the field. SMZ area of coupe is not within planned harvest unit and will not be affected by harvesting.	Harvest unit has been marked out side the landscape SMZ in pink tape with the use of GPS, Compass, clinometre, hip chain and Range finder. A 60m buffer from the mown grass/backyard/campfire area of the DELWP owned property was agreed to by DELWP. This 60m buffer was measured with the use of a hip chain/stringline (location agreed to by VicForests & DELWP).
Non-State Forest in coupe	OTHER PUBLIC LAND	0.00	0.00	Coupe within 200 meters of Other Public Land (Little Yarra Water Frontage) . Land managed by name of DEWLP. Value will not affect Coupe area.	Other public land is not within or adjacent to coupe boundary and will not be affected by harvesting. no further action	
Other situation issues	Other situation issues	[n/a]	Present	Planned burn (PP-YRA-POW-0029) located within coupe boundary	DELWP notified of intention to harvest 08/10/2020. No further action required.	
Permanent fire break in coupe	* None found *	0.00	0.00	No action required		
Permanent fire break within 500m of coupe	* None found *	0.00	0.00	No action required

Forester Section - Coupe Management Actions

Issues identified						
4. Biodiversity	Value	Identified by spatial overlay as	Identified during manual check as	Value Description	How the value will be managed	Management Action Taken or Prescription Applied
Greater Glider Habitat Within 100m (Modelled Class1)	Modelled Greater Glider Habitat within 100m	Not Present	Not Present	No action required		
Leadbeater's Possum habitat in coupe (Modelled/Zone1A)	Modelled Leadbeater's Possum habitat	Not Present	Not Present	No action required		
Leadbeater's Possum habitat within 500m (Modelled/Zone1A)	Modelled Leadbeater's Possum habitat	Not Present	Not Present	No action required		
Old Growth Forest in coupe	* None found	0.00	0.00	No action required		
Old Growth Forest within 500m	* None found	Not Present	Not Present	No action required		
Other biodiversity issues	Other biodiversity issues	[n/a]	Present	Coupe overlay process has detected low to medium potential Tree Geebung habitat within the coupe boundary.	If more are found within coupe, protect mature Tree Geebung with a 50m radius buffer. If buffer is later on not required, follow VFSMP319 and protect mature individual trees and populations where possible by incorporating them into areas that will be excluded from harvesting and thus protected from disturbance (both mechanical and fire). This can be through including trees in extended code exclusion areas (e.g. stream buffers) or grouping areas into clusters that protect multiple values (e.g. retained habitat). Contractor is to be made aware of species and to make efforts to avoid disturbing individual trees that have not been placed in exclusion areas.	Mature Tree Geebung have been identified within the TRP and harvest unit. Each Tree Geebung has been placed within a 50m radius buffer with no Tree Geebung closer than 15m from the boundary in accordance with court orders from 16/10/2020. The contractor will be briefed about measures to protect Tree Geebung within the Harvest unit.

Threatened fauna site in coupe	Petauroides volans: Greater Glider	Present	Present	Greater Glider species observation record within coupe boundary	Apply VicForests Greater Glider Conservation Strategy prescriptions. Prioritise the largest, live, hollow-bearing trees for habitat retention.	Contractor will prioritise the largest, live, hollow bearing trees for habitat retention.
Threatened fauna site within 500m of coupe	Ninox strenua: Powerful Owl	Present	Present	Victorian Biodiversity Atlas (VBA) record of Ninox strenua: Powerful Owl was detected during the overlay process, located greater than 100 metres from the coupe boundary. Record type was observed and is dated from 2012. No further action.	Individual records of this species do not require any management actions. Foresters to be vigilant for potential roosting or nesting sites. If identified operations must cease immediately within a 300m radius of the identified site and the Manager Forest Policy and Compliance notified. Where identified, harvesting must not commence or re-commence within the vicinity until advice has been provided by either Manager Biodiversity Conservation and Research or Manager Forest Policy and Compliance.	No Powerful Owl were identified in the field. If identified they will be protected. Contractor will be made aware and protect if identified. If identified operations must cease immediately within a 300m radius of the identified site and the Manager Forest Policy and Compliance notified. Where identified, harvesting must not commence or re-commence within the vicinity until advice has been provided by either Manager Biodiversity Conservation and Research or Manager Forest Policy and Compliance. The contractor will be provided with Large Forest Owl Fact Sheet and briefed on the identification of signs of habitat/roost trees and requirement to notify VicForests of these signs.

4. Biodiversity	Value	Identified by spatial overlay as	Identified during manual check as	Value Description	How the value will be managed	Management Action Taken or Prescription Applied
Threatened fauna site within 500m of coupe	Tyto tenebricosa: Sooty Owl	Present	Present	Victorian Biodiversity Atlas (VBA) record of Tyto tenebricosa: Sooty Owl was detected during the overlay process, located greater than 100 metres from the coupe boundary. Record type was observed and is dated from 2012. No further action.	Individual records of this species do not require any management actions. Apply VicForests HCV management system. Foresters to be vigilant for potential roosting or nesting sites. If identified operations must cease immediately within a 300m radius of the identified site and the Manager Forest Policy and Compliance notified. Where identified, harvesting must not commence or re-commence within the vicinity until advice has been provided by either Manager Biodiversity Conservation and Research or Manager Forest Policy and Compliance.	No Sooty Owl were identified in the field. If identified they will be protected. Contractor will be made aware and protect if identified. If identified operations must cease immediately within a 300m radius of the identified site and the Manager Forest Policy and Compliance notified. Where identified, harvesting must not commence or re-commence within the vicinity until advice has been provided by either Manager Biodiversity Conservation and Research or Manager Forest Policy and Compliance. The contractor will be provided with Large Forest Owl Fact Sheet and briefed on the identification of signs of habitat/roost trees and requirement to notify VicForests of these signs.
Threatened fauna site within 500m of coupe	Petauroides volans: Greater Glider	Present	Present	Greater Glider species observation record within coupe boundary	Apply VicForests Greater Glider Conservation Strategy prescriptions. Prioritise the largest, live, hollow-bearing trees for habitat retention.	Contractor will prioritise the largest, live, hollow bearing trees for habitat retention.
Threatened fauna site within 500m of coupe	Geotria australis: Pouched Lamprey	Present	Present	Victorian Biodiversity Atlas (VBA) record of Geotria australis: Pouched Lamprey was detected during the overlay process, located greater than 100 metres from the coupe boundary. Record type was observed and is dated from 1985. No further action.	Species detection is from 1985 and approx. 450m from planned harvesting area. No detection based requirements for the special management of the species. Apply VicForests HCV management system, specifically Harvest and Regeneration systems.	Permanent and temporary streams have been buffered out of the Harvest unit to protect water quality. Harvest unit has been marked with pink tape with the use of GPS, Compass, clinometre, hip chain and Range finder.
Threatened flora site within 500m of coupe	Astelia australiana: Tall Astelia	Present	Present	VBA record from 1980 of Tall Astelia species detected in overlay process within 500m of coupe boundary. Species listed in the VicForests Operating Procedures with prescriptions.	For field verified plants apply 40m buffers to permanent streams situated upstream from location of Tall Astelia. Apply 100m buffer around all Tall Astelia colonies. For isolated plants on roadsides, a 40m buffer must be applied.	No Tall Astelia identified in the field. If identified they will be protected. Contractor will be made aware and protect if identified. If identified operations must cease immediately until 40m buffers to permanent streams situated upstream from location of Tall Astelia are in place. Apply 100m buffer around all Tall Astelia colonies. For isolated plants on roadsides, a 40m buffer must be applied.

4. Biodiversity	Value	Identified by spatial overlay as	Identified during manual check as	Value Description	How the value will be managed	Management Action Taken or Prescription Applied
Threatened flora site within 500m of coupe	Personia arborea: Tree Geebung	Present	Present	Tree Geebung species observation record within 500m of coupe boundary.	Protect mature Tree Geebung with a 50m radius buffer. If buffer is later on not required, follow VFSMP319 and protect mature individual trees and populations where possible by incorporating them into areas that will be excluded from harvesting and thus protected from disturbance (both mechanical and fire). This can be through including trees in extended code exclusion areas (e.g. stream buffers) or grouping areas into clusters that protect multiple values (e.g. retained habitat). Contractor is to be made aware of species and to make efforts to avoid disturbing individual trees that have not been placed in exclusion areas.	Mature Tree Geebung have been identified within the TRP and harvest unit. Each Tree Geebung has been placed within a 50m radius buffer with no Tree Geebung closer than 15m from the boundary in accordance with court orders from 16/10/2020. The contractor will be briefed about measures to protect Tree Geebung within the Harvest unit.
Threatened Species Observations in coupe	Petauroides volans: Greater Glider	Present	Present	Greater Glider species observation record within coupe boundary	Apply VicForests Greater Glider Conservation Strategy prescriptions. Prioritise the largest, live, hollow-bearing trees for habitat retention.	Contractor will prioritise the largest, live, hollow bearing trees for habitat retention.
Threatened Species Observations within 500m of coupe	Personia arborea: Tree Geebung	Present	Present	Tree Geebung species observation record within coupe boundary.	Protect mature Tree Geebung with a 50m radius buffer. If buffer is later on not required, follow VFSMP319 and protect mature individual trees and populations where possible by incorporating them into areas that will be excluded from harvesting and thus protected from disturbance (both mechanical and fire). Contractor Section - Harvesting Commencement & Completion Declarations

Harvesting commencement declaration	Contractor/HTL Initial	VicForests Initial
▪ I have received a copy of the Forest Coupe Plan and a copy of the Utilisation Procedures.		
▪ I have discussed this Forest Coupe Plan with an Officer of VicForests and understand it.		
▪ I will ensure that this operation is conducted in accordance with the Forest Coupe Plan, the Utilisation Procedures and the Occupational Health and Safety Act.		
▪ I will ensure that all operators working on this coupe are aware of their responsibilities under this Forest Coupe Plan.		
▪ I will ensure that all operators hold a current FOLS with all appropriate endorsements prior to them commencing work on the coupe.		
▪ An identification of hazards associated with this coupe was conducted in accordance with the Industry Standard: Safety in Forestry Operations (Harvesting and Haulage) 2007 and the Occupational Health and Safety Act 2004.		
▪ The Contractor/HTL acknowledges that it is their responsibility to identify the appropriate controls for all identified hazards. VicForests acknowledges that the Contractor/HTL has a hazard control plan that identifies all addresses all identified hazards.		
▪ Landing(s) location has been agreed to by VicForests and the Contractor/HTL		
▪ Location/selection of retained trees has been agreed to by VicForests and the Contractor/HTL		
▪ I have been briefed on the identification and habitat retention strategies put in place to manage Biodiversity Values identified in this coupe as outlined in the HCV summary and retention plan
