Glossary

Coupe – A contiguous area of forest of variable size, shape and orientations from which timber is harvested or a roadline for access requirements.

Coupe Number – A unique 10-digit reference number that indicates the location of an individual coupe or roadline.

Driveway Area - An area between an existing permanent road and the coupe boundary within which a coupe-access road of up to 500m in length may be constructed. The coupe driveway is spatially represented by a separate polygon and has the same coupe address as the coupe it will access.

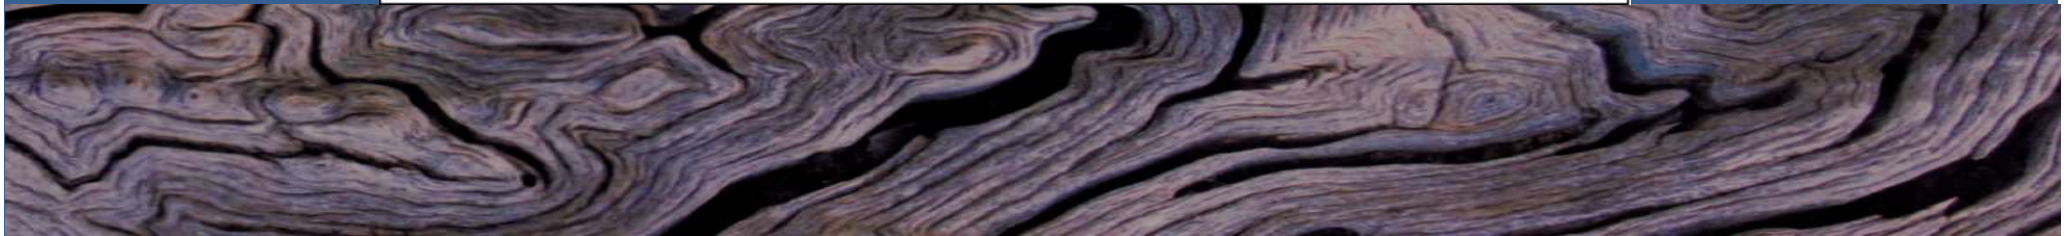

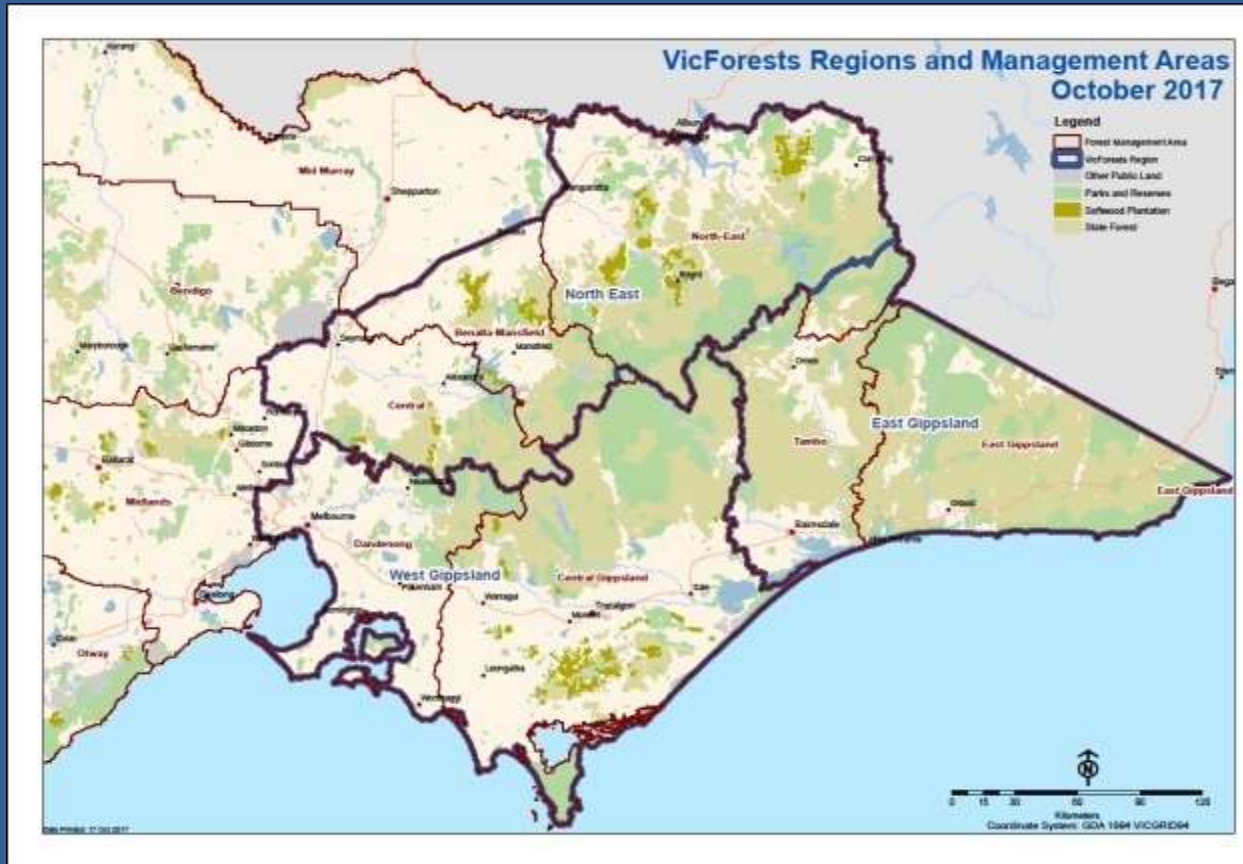

Gross Area - The area within which any individual harvesting or roadline coupe's operations will be conducted. It is represented spatially and approved for inclusion on a Timber Release Plan.

Period of Harvest - an approximate timeframe a coupe may commence harvesting.

Road Length – Indicates access coupes, they have their own coupe address, these can either be for road improvements or road construction. The approximate road that links a permanent road to a coupe.

Timber Release Plan / TRP – A Timber Release Plan is a list of areas and spatial information, outlining where timber harvesting, regenerating and road works are authorised to be completed by VicForests.

TRP Status – To define the difference between a planned coupe (Current) and one that is regenerating (Current Regen).
